

Updates

Assignment 1 is submitted.... right?!?

Assignment 2 is posted. It is due Sept 29th.

Other things? Questions? Concerns?

Questions

Why collect data?

What are the challenges in collecting data?

What data is collected from you in your lives?

Open Data Kit (ODK) Mobile Data Collection, Aggregation, and Dissemination

Collecting data in low-income regions is difficult.

Lag between data collection and actionable information.

Paper is common, but can be very limiting.

Growth of cellular technology enables innovation

Mobile subscriptions per 100 inhabitants

Aren't devices expensive?

Extra costs:

Devices: \$80-400

Data Plans (sometimes)

Server cost: ~\$2/month (or self hosting, large upfront cost).

Savings:

Data transcription

Data validation

Transportation

TIME

Result:

Devices pay for themselves within 2 campaigns

Open Data Kit (ODK)

- ❑ Project started in 2008
- ❑ Mobile data collection tools for Android devices
 - ❑ There was too much focus on clumsy J2ME devices
 - ❑ Not enough focus on the trajectory of technology
- ❑ Modular, open architecture
 - ❑ Too many stove-piped solutions
 - ❑ Large commercial enterprise systems
- ❑ Open source (Apache2)
 - ❑ To use for any purpose

ODK uses phones and tablets to digitize data collection.

Build: Drag and drop prompts for form creation.

The screenshot displays a form builder interface. At the top, there is a menu bar with 'File', 'Edit', 'View', and 'Help', and a status indicator 'Not signed in. Sign in now.'. The main area shows a list of form prompts, each with an icon and a close button (X). The prompts are:

- Enter the head of household's full name (Text field)
- Enter the head of household's birth date (Date field)
- Capture the GPS location of the house (Location field)
- Record video of a walk around the house (Media field)

On the right side, there is a 'Properties' panel for the selected 'Text' field. It includes the following settings:

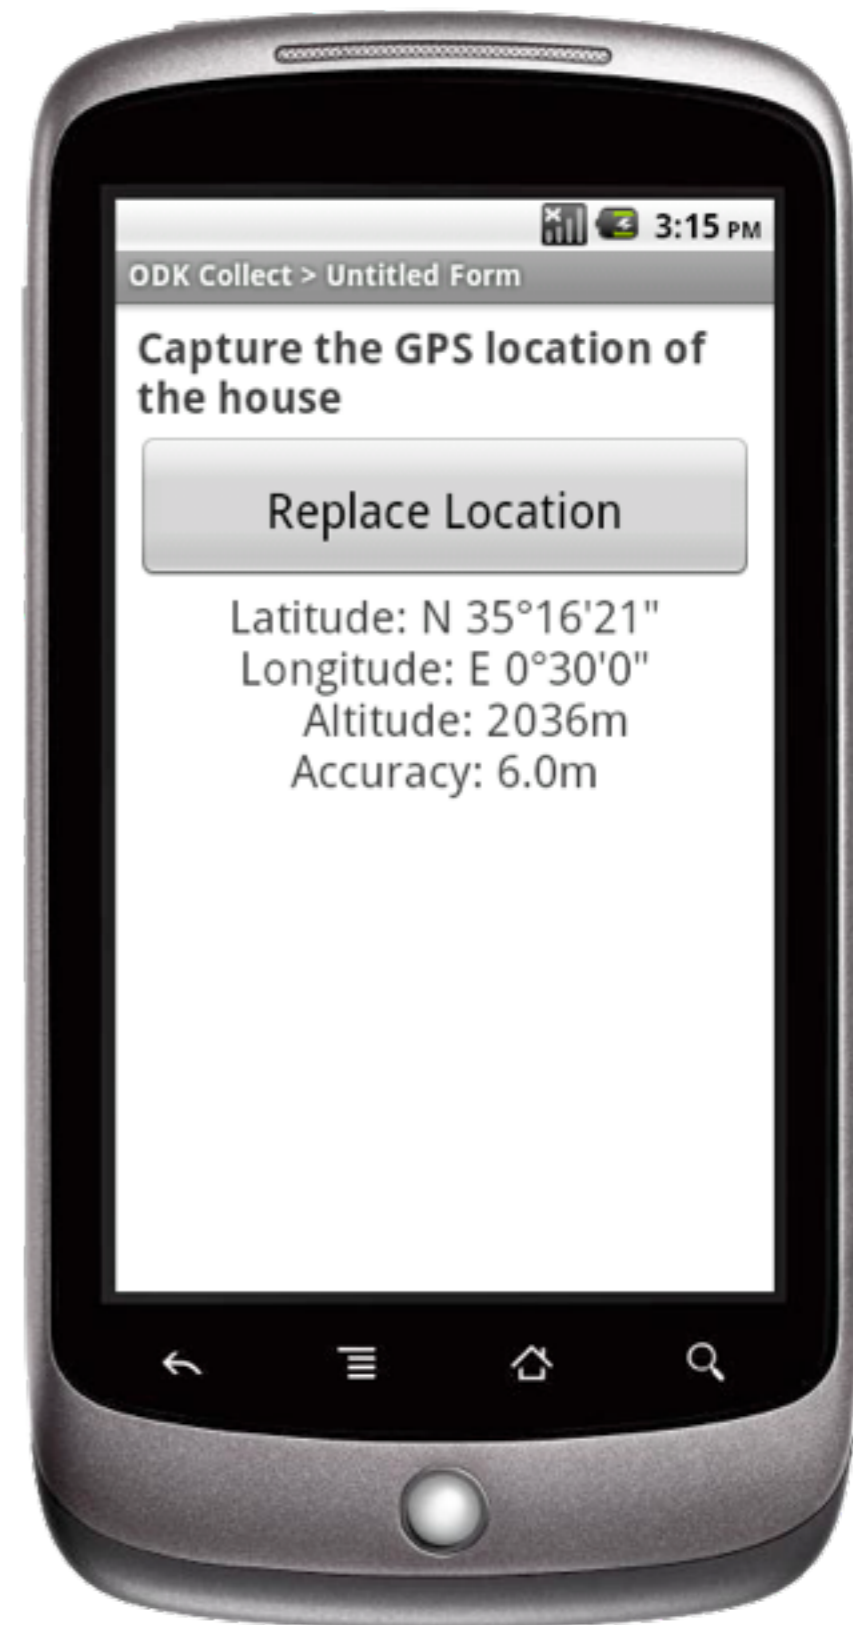

- Data Name:** name
- Caption Text:** Enter the head of household's full name
- Hint:** Additional help for this question.
- Default Value:** (Empty field)
- Read Only:** Whether this field can be edited by the end user or not.
- Required:** Whether this field must be filled in before continuing.
- Length:** Valid lengths for this user input of this control.
 - Enable:**
 - Minimum: (Empty field)
 - Maximum: (Empty field)

At the bottom, there is a toolbar with an 'Add new' button and a list of field types: Text, Numeric, Date, Location, Media, Barcode, Choose One, Select Multiple, Group, and Branch.

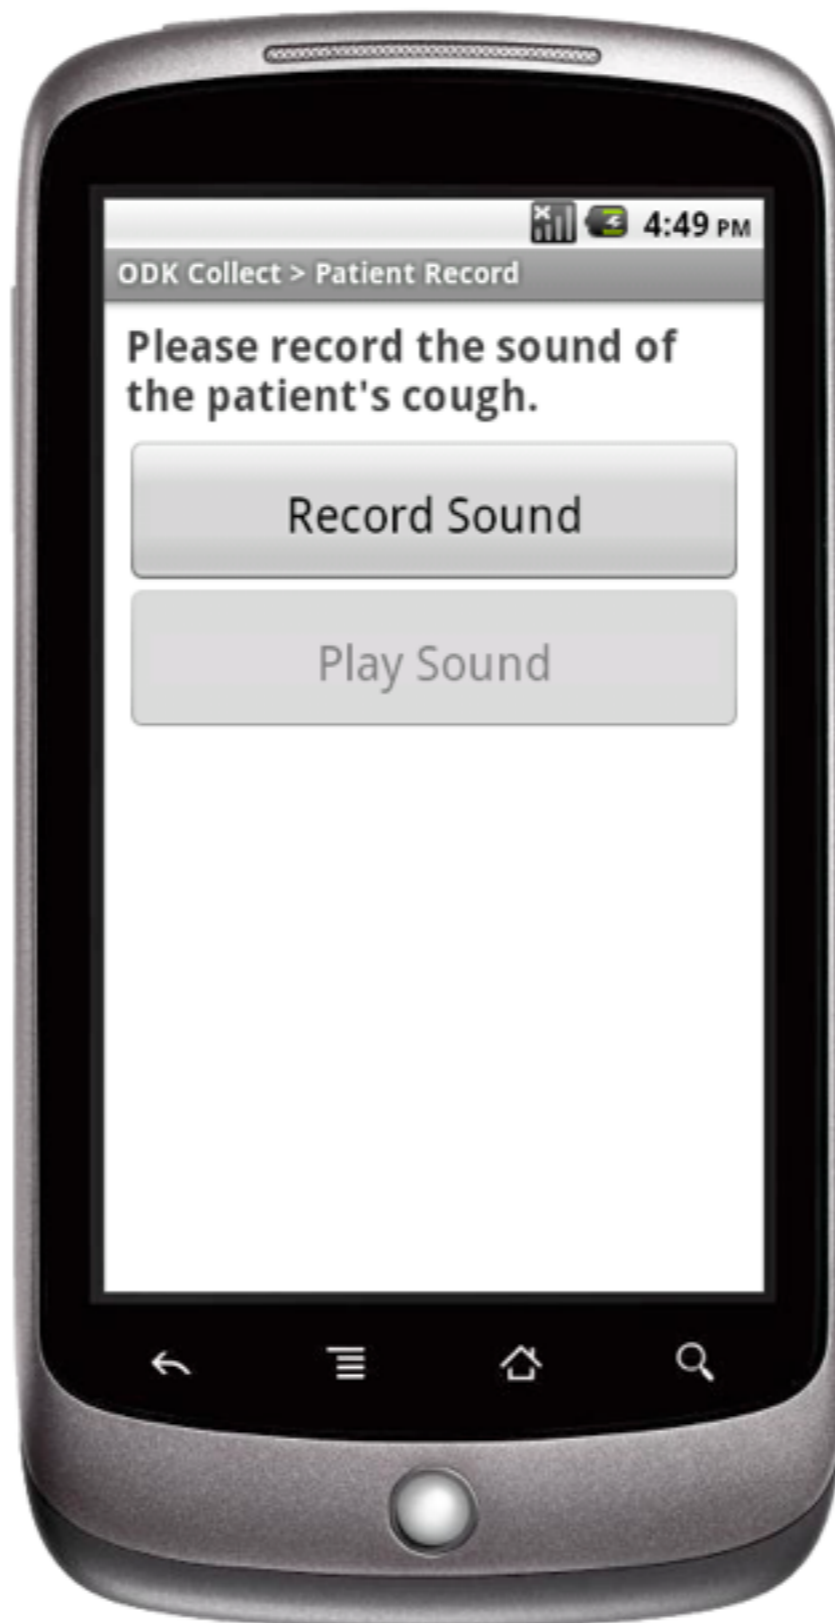

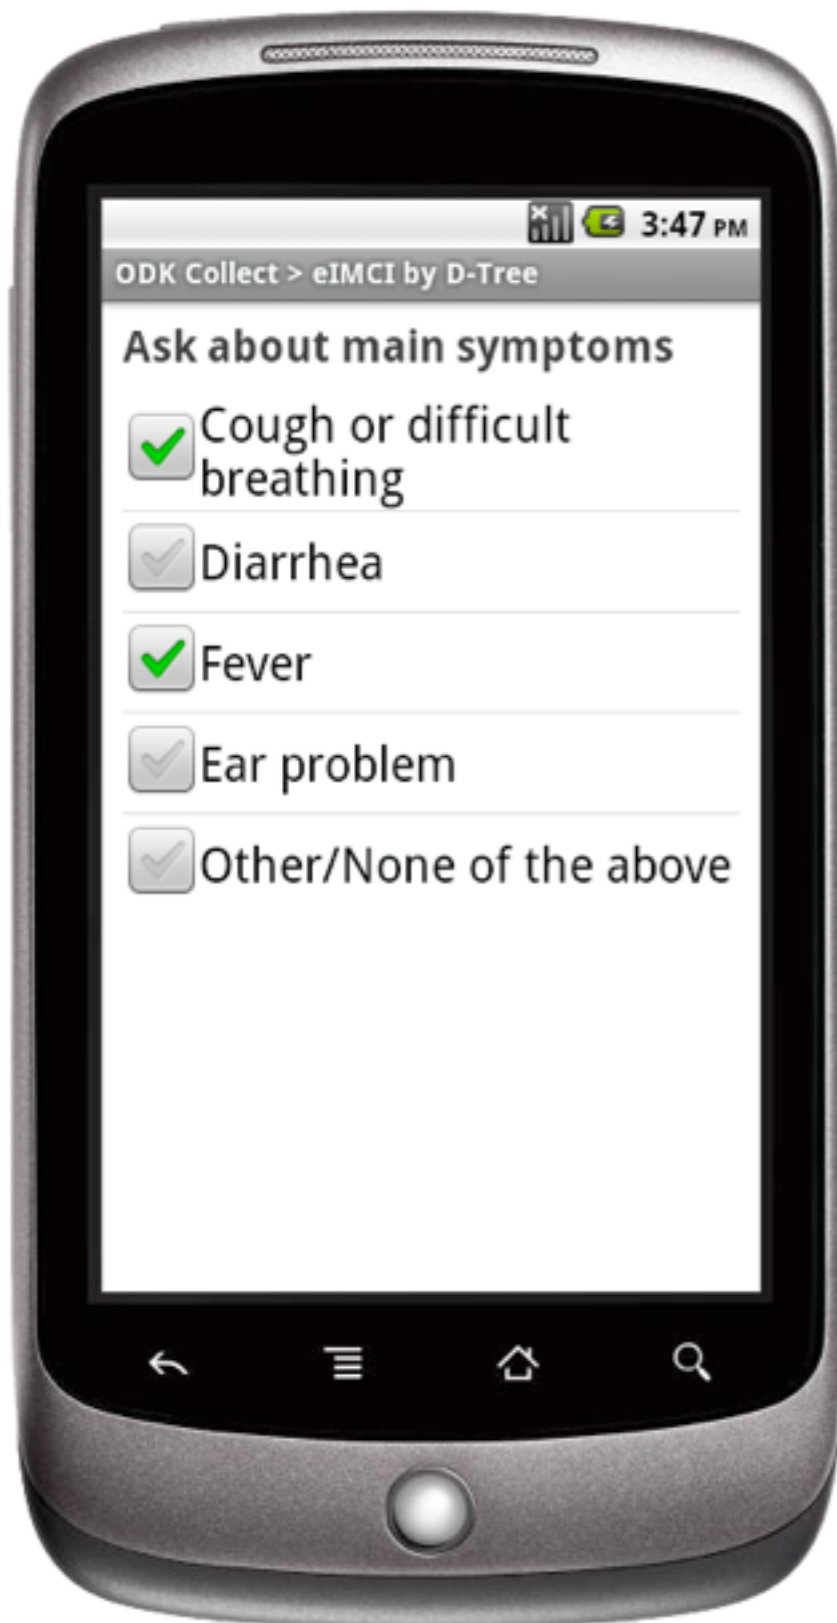

XForms describes the form logic and data schema.

```
<instance>
  <data>
    <name/>
    <date/>
    <location/>
    <picture/>
  </data>
</instance>
<itext>
  <translation lang="eng">
    <text id="/data/name:label">
      <value>Enter the head of household's full name</value>
    </text>
    <text id="/data/date:label">
      <value>Enter the head of household's birth date</value>
    </text>
    <text id="/data/location:label">
      <value>Capture the GPS location of the house</value>
    </text>
    <text id="/data/picture:label">
      <value>Record video of a walk around the house</value>
    </text>
  </translation>
</itext>
<bind nodeset="/data/name" type="string"/>
<bind nodeset="/data/date" type="date"/>
<bind nodeset="/data/location" type="geopoint"/>
<bind nodeset="/data/picture" type="binary"/>
</model>
</h:head>
<h:body>
  <input ref="name">
    <label ref="ir:itext('/data/name:label')"/>
```

Collect: Display prompts for data collection.

Collect: Multiple languages and multimedia ability.

Aggregate: Host data and provide extraction interfaces.

Growing community around the platform.

- [Nafundi](#) - A company started by the guys who invented ODK. If you need professional support or require changes to ODK tools, why not try the only company the ODK team recommends?
- [Dimagi](#) - Provides support for core and custom development on the Open Data Kit platform. They work closely with team that founded ODK.
- [Mindflow Associates](#) - Have experience customizing OpenMRS, ODK data collection solutions, building Android phone based applications, utilizing JavaRosa-based technologies amongst many others.
- [Afrisis](#) - Has developed and deployed end to end (mobile, touch-screen kiosks, SMS, desktop, web) software solutions across all provinces of Mozambique. They are quite familiar with JavaRosa-based technology.
- [Mega Six Solutions](#) - Based in Kenya, and specializing in Research and IT domains, we have expertise in data management processes. Using our Android development team, Mega Six will help you customize ODK for desired data collection and aggregation.
- [Group Complete](#) - Will design and implement survey collection forms for users of Group Complete (and ODK-based tool) for free.
- [ULevel](#) - A company based in Brazil doing customizations on Collect for Android.
- [WebFirst](#) - Well versed in the development of data collection systems like JavaRosa and ODK in low-resource and standard environments.
- [EarlySail](#) - Have customized ODK Collect for a few pilot projects as well as assisted in form development. They will soon be porting ODK to BlackBerry.
- [Seeing Swans](#) - A company focusing on data collection and complex analytics. They have customized

Diverse Implementer Community

Home

Open Data Kit (ODK) is a free and open-source set of tools which help organizations author, field, and manage mobile data collection solutions. ODK provides an out-of-the-box solution for users to:

1. **Build** a data collection form or survey ([XLSForm](#) is recommended for larger forms);
2. **Collect** the data on a mobile device and send it to a server; and
3. **Aggregate** the collected data on a server and extract it in useful formats.

In addition to socio-economic and health surveys with GPS locations and images, ODK is being used to create decision support for clinicians and for building multimedia-rich nature mapping tools. See the list [available tools](#), [featured deployments](#), and [implementation companies](#) for more examples of what the ODK community is doing.

We welcome and encourage [participation](#) from the user community. ODK is supported by a growing community of developers, implementers and users as well as [various companies](#). Core ODK development is supported by ongoing [research](#) at the University of Washington's Department of Computer Science & Engineering and through [donations](#) from users.

Below are two short videos explaining a bit about the project.

Open Data Kit (ODK) is a free and open-source set of tools which help organizations author, field, and manage mobile data collection. ODK provides an out-of-the-box solution for users to:

- [Build](#) a data collection form or survey;
- [Collect](#) the data on a mobile device and send it to a server; and
- [Aggregate](#) the collected data on a server and extract it in useful formats.

In addition to socio-economic and health surveys with GPS locations and images, ODK is being used to create decision support tools and for building multimedia-rich nature mapping tools. See [featured deployments](#) and [list of tools](#) for more examples of what the project is doing. We welcome and encourage [participation](#) from the user community.

Downloads of the tools are available at [Downloads](#).

Below is a [short video](#) explaining a bit about the project.

Tired of clipboards and paper forms?

Nafundi can replace your paper forms and surveys with smartphones and tablets. Our apps will help your mobile staff (e.g., census takers, health workers) collect data accurately and report results instantly.

[Learn More](#)

Nafundi designs, builds, deploys, and supports mobile data collection software. We started [Open Data Kit](#), the best way to build forms, collect data, and aggregate results.

Nafundi ensures Johns Hopkins can monitor and evaluate research globally

"We've used Open Data Kit for years and we love it. Our latest project needed new features that were not in ODK Collect and so we came to Nafundi for help. We knew it would be a lot of work in a short amount of time but they delivered big time. If you need changes to ODK done well and on time, I can't recommend Nafundi enough."

Luke MacDonald
Assistant Director
Johns Hopkins University Global Water Program

Nafundi works with Google to monitor changes to the Earth's ecosystems

"I've been working with Nafundi's founders since 2009, from the Amazon rain forest to the heart of Africa. They have a rare ability to discern the essence of a problem and deliver solutions that are easy to use, work at scale, and make a difference."

Rebecca Moore
Engineering Manager
Google Earth Outreach, Google Earth Engine

Nafundi helps Task Force for Global Health eliminate tropical diseases

"Being able to quickly collect and process data is vital to public health programs. We've been working with Nafundi for years, and they are great at solving the pain points (on mobile and desktop) we come across. They work quickly, solve problems the first time, and give us the confidence we need to scale. We could not do our work without Nafundi."

Alex Pavluck
Neglected Tropical Diseases Support Center
International Trachoma Initiative

ODK Usage

- ODK has been a successful open source project
 - Website usage stats (still doubling every year)
 - Over 150K unique visitors from 202 countries
 - Average of 10K unique visitors/month
 - Code site gets over 3K unique visitors/month
 - Online survey (73 respondents) last year (small portion of users)
 - 55 deployments involving >5500 devices in 30+ countries
 - Installs and code downloads
 - 3.5K code downloads
 - 25K distinct clients have installed ODK Collect using Play
 - NOTE: many orgs setup their devices directly w/o Play
